## Branches in India

Ahmedabad  
5, Celler Janpath Commercial Centre, Ashram  
Road, Ahmedabad - 380 009, Gujarat.  
Ph. : +91-9426064405

Coimbatore  
307, Shubhu Complex, R.S. Puram,  
Coimbatore - 641 002 , Tamil Nadu.  
Ph. : +91-9363222806

Udhna - Surat  
Plot No. A 16/7, Shop No. F/6, Road No. 10  
Udhna – 394210, Gujarat.  
Ph. : +91-9825123560

## COMPANY PROFILE

Jupiter Ceramics, founded in 1985 is a name with a standing of more than 35 years in ceramic thread guides manufacturing in India. We are one of the most reliable and trustworthy name in the Indian textile industry, when it comes at providing quality ceramics spares and assemblies for textile machinery at competitive price.

Our Delhi based manufacturing unit is well equipped with modern machinery and research and development facility. This enables us to produce and deliver large quantities of spares in shortest lead time at a competitive price. Our strong sales network spread across India allows us to serve both our national and international clients in shortest possible lead time.

We also manufacture components in accordance with the client's specification. The company's philosophy revolves around client's need and satisfaction. We strive to achieve this by strict adherence to quality control and continuous research and development of our products for the new generation of yarn processing machines.

# PRODUCT RANGE

## Ceramic Thread Guides

Thread guides made of ceramic material provides superior friction coefficient and low impact on high speed yarn. Guides made of ceramic have high wear resistance and are inert to various processing chemicals used in textile industry. Hence, they have longer service life compared to other materials used in textile industry.

These properties of ceramic guides make them suitable for use in an array of textile and yarn processing machineries.

We offer our guides in four basic materials:

1. High alumina porcelain
2. Aluminium oxide
3. Titanium dioxide
4. Zirconium oxide

## **Aluminium Oxide Thread Guides**

Aluminium Oxide is a hard material which is inert to all acids and alkaline solutions used in textile industries. It is a very good heat conductor and is close to metals in term of thermal conductivity and linear expansion.

Aluminium oxide guides with matte, ground and polished surfaces can be produced with a general tolerance of  $\pm 0.2\text{mm}$  or 2%. Products with smaller tolerance can also be manufactured as per the client's requirements.

## **Titanium Di-Oxide Thread Guides**

Titanium di-oxide thread guides are a perfect match for endless synthetic yarns, where each and every thin yarn filament must be treated with utmost care. Apart from yarn guides, titanium di-oxide guides are equally good for other class of fibres like glass fibre yarn.

The yarn run surface of these guides can be polished to extreme smoothness. This allows for optimal sliding of yarn on friction texturing machines and therefore, this type of technical ceramic is irreplaceable.

## **Zirconium Oxide Thread Guides**

Zirconium oxide is an extremely refractory material. These thread guides have excellent wear resistance and provides excellent chemical and corrosion inertness at temperatures well above the melting point of aluminium oxide.

Choosing the right ceramic material:

- Yarn or thread type
- Working angle of the yarn
- Thread count
- Number of filaments in the yarn
- Yarn or thread speed
- Pre-guide tension
- Length of guide contact surface
- Spin finish
- Environment (temperature, humidity, etc.)
- Static electricity build-up

Important properties of a thread guide have to meet are:

1. Wear resistance
2. Frictional characteristics of the guide surface
3. Chemical resistance
4. Fracture strength
5. Surface structure (not to damage the yarn).

#### TECHNICAL CHARACTERISTICS OF THREAD GUIDES

MATERIAL		TITANIA	ALUMINA	ZIRCONIA
Colour		Yellow	White, Pink, Red, Ivory	Yellow Ochre
Appearance		Dense	Dense	Dense
Density	$\text{g cm}^{-3}$	3.8 to 4.0	3.7 to 3.9	5.6 to 5.9
Water Absorption	%	Nil	Nil	Nil
Max. Operating Temperature	$^{\circ}\text{C}$	1000	1600	2000
Thermal Expansion Coefficient	$\times 10^{-6} \text{ K}^{-1}$	8.5	5 to 8.3	10
Specific Gravity		4.0	3.8	5.8
Roughness Ra	$\times 10^{-6} \text{ m}$	0.1 to 0.9	0.15 to 1.6	0.1 to 1.2
Bending Strength	MPa	70	300	1300
Compressive Strength	MPa	600	2400	3000
Modulus of Elasticity	GPa	230	350	205
Vickers Hardness	kg f	900	1850	1150
Thermal Conductivity	$\text{mm}^{-2}$	25	24	2
Thermal Shock Resistance	$\text{Wm}^{-1}\text{K}^{-1}$	–	250	280
Dielectric Constant	$^{\circ}\text{C}$	85	10	–

## Tension Devices

Tension devices are designed for uniform tension and smooth movement of yarn at all points. These devices enable easy adjustment of tension for different counts and types of yarn.

We manufacture a number of tension devices for twisting, winding, sizing and other textile machines.

## Standard Assemblies

Ceramic thread guides are used along with plastic and metal components in textile machinery. We offer a number of standard assemblies in order to serve our clients better.
